NEW SAFETY REGULATIONS FOR GARAGES

VALUABLE HINTS GIVEN ON SAFE METHODS OF WORKING WITH CAR IN GARAGE

A new well edited tabulating safety rules for garages has been issued by the Industrial Accident Prevention Association of Ontario. The text points out the hazards connected with various operations in garage work and suggests means of avoiding them. The regulations are:

1. Working Under Cars—Before workmen are permitted to go under a car to make adjustments or repairs, the car must be either resting naturally on the floor or cric, or suspended and blocked in such a manner that there is no possibility of the car falling. Un-

We know DUNLOP REINFORCED CABLE CORD TIRES

WILL GIVE YOU MAXIMUM MILEAGE SAFETY SATISFACTION

ONE weak tire may do more than spoil your holiday. It may result in a serious accident.

Take a few minutes today and let us inspect your tires. Inspection won't cost you anything, and if you need a new tire our DUNLOP Reinforced Cable Cords will give you dependable service at the lowest cost per mile. DUNLOPS hold every one of the existing 61 world's records for land speed—indisputable proof of their ability to give exceptional service.

used. Wrenches having sprung or cracked jaws should not be used until repaired.

Electric light or power drop cords should be as short as possible, and all extension cords must be equipped with a pull socket (valveport) when connected to same. The installation must be kept in first class condition. All circuits must be properly fused, all wiring must be enclosed in metal conduit, and switches must be kept in a fireproof box and kept in good repair. All electrical materials and installations must be in accordance with the

Automobiles Done Up In Paper Bags

Automobiles are now being delivered, wrapped in paper packages. The Packard Motor Car Co. has instituted the plan with its two-door passenger models, not only for the privacy of the idea, but also for protection of the car's finish. The car is thus kept waiting for the new owner or while waiting for the new owner to unwrap it and drive home.

and regulations of the Hydro-Electric Power Commission of Ontario (as far as Ontario garages are concerned).

4,000 Barred From Roads Of Ontario

The report released by The Ontario Licensing Division, Motor Vehicle Branch, Department of Highways, Ontario, reveals that during the 27 months in which the legislation has been in force, nearly 4,000 resident automobile drivers have been ruled off the road. The right to drive was removed from these operators either because they were shown to be reckless or dangerous to public safety, or because they were found to be financially irresponsible and unable to maintain

to pay insurance premiums. In the same period, total suspensions were 1,261. These persons, by reason of convictions registered or failure to satisfy judgments against them, had the privilege of reviving or operating motor vehicles in Ontario suspended. Of these, 1,279 have regained the right to drive. It having satisfied the judgments rendered against them, at the same time filing proof of their financial responsibility, while the remainder satisfy their debts. In

To-Morrow's Auto Should Be A Marvel

The technologist is able to produce an automobile that would easily be of service. Designs are all available for a machine that would have a Hickman or a boat-type position, individual wheel suspension, exposed gear parts that would not quit, frictionless bearings through-

out, and would have an average life of 300,000 to 500,000 miles without a general overhauling.

HERE'S

at Lowest Prices

FOR an inexpensive tire that will do a real job in delivering long, trouble-free mileage, we have never met the equal to the DUNLOP Pacemaker. This tire, built to DUNLOP Cable Cord standards, gives exceptional mileage—and yet is as low as any of the so-called " bargain " tires.

Dunlop Tires are Guaranteed for 12 months against all Road Hazards except Punctures and Road Run Running Flat.

Stinson, Kent. St. Opp. Armouries, Lindsay

The two men, who are Canadians or Americans and are between the ages of 30 and 40, have been driving from place to place in a Chrysler car cashing the money orders at garages and service stations.

Descriptions of them have been given, but Chief Lawler warns Lindsay people that it would be better for merchants not to cash money orders for anyone they do not know personally and, above all, to be on the lookout for the alarm.

NEW STEAM-LINED TRAIN CROSS WEST AT 110-MILE SPEED

Below, engineers' drawing of the new steam-lined, high-speed train to be put in service by the Union Pacific. Above, artist's conception of the 100-mile-an-hour train's wing around a curve. Inset, E. A. Adams, U. P. vice president, credited with the new idea in transportation.

Road Fights Air And Bus Competition

By NEA Service
OMAHA, Neb., July 27—A metal steam-lined train of revolutionary new design soon will be racing across Western plains at a new record speed of 110 miles an hour. The new train will be the answer if the Union Pacific railroad to beat air and bus competition. It is expected—110 miles an hour at the maximum—will compare with that of airplanes and its economy of operation with buses. Officials of the railroad believe it will be able to make the trip from Omaha to Los Angeles in 39 hours.

The railroad company has planned to order for construction of the train, which will require six months to build, in engineering drawings it looks something like a giant caterpillar.

Aluminum or light-alloy metal will be used in construction, since steel would be too heavy. Power will be supplied by a diesel-burning motor at the front, however, connected directly with electric generators and motors on the train.

There will be three cars, and it will travel with approximately 80 tons, compared to 1000 tons of a freight train.
